linkedin.com/in/akhil-azad-378147325

SUMMARY

Third-year Computer Science Engineering student with a strong foundation in artificial intelligence, machine learning and software engineering, plus a genuine interest in robotics and intelligent systems. Independently architected a modular AI assistant with natural language understanding, computer vision and voice interaction, alongside full-stack development across the SDLC.

EDUCATION

Chitkara University — B.E. Computer Science

Expected June 2028

TECHNICAL SKILLS

AI / ML	Local LLM integration, Ollama, Llama-based models, natural language understanding, reasoning pipelines
Computer Vision	OpenCV, YOLO, object detection, face recognition
Voice / Speech	Speech recognition, text-to-speech
Programming	Python, Java, C, SQL, JavaScript
Engineering	OOP, modular architecture, data structures & algorithms, SDLC
Frameworks & Tools	React, Node.js, Express, MongoDB, Git, GitHub, VS Code, Vercel, Render

PROJECTS

Project HALO

AI Assistant · Python

Modular local AI operating system with natural-language understanding, computer vision, voice interaction, local LLMs, planning and intelligent automation — designed as an extensible platform.

Conclave

Multi-Agent Framework · Python

Modular multi-agent orchestration framework for building autonomous AI teams and coordinating specialized agents with shared knowledge and agent components.

Become Fit

Full-Stack · Web

Full-stack fitness coaching platform with Razorpay payment integration and automated PDF program delivery.

SARA AI

Voice Assistant · Python

Local voice assistant combining speech recognition, text-to-speech, computer vision, contextual memory and task automation.
